Art Unit: 2612

1. The following is an examiner's statement of reasons for allowance:

Regarding the rejection under 35 U.S.C. 112, first paragraph, as to the recitation of "using a wireless link within the device to store a password in a memory", applicant's argument that "the ordinary person skilled in the art would comprehend that any password data to be stored in the RFID tag must be communicated by the 'wireless link' within the device as it is the only wireless link disclosed in the application for communicating data with the RFID tag of...(the removable) component (of the device)" is agreed with.

Regarding the prior art, the art of record fails to teach or suggest a method of operating a device including a removable component, comprising using a wireless link within the device to store a password in a memory attached to, or incorporated into, the removable component, and controlling access to the device using the stored password, or utilizing the password to selectively enable or disable operation of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
